

DevOps Kitchen Workshop

Fetching AWS Resources Details

#week_seventeen - Boto3 SDK 

duration: 1 week

ForgTech company wanna test your ability to Deliver their requirements utilizing Python, This will help you to build a good reputation.

The FrogTech Cloud Team requests you implement a local Python script with AWS Boto3 SDK that fetch the details below:

1. All VPC details in us-east-1 region.
2. All EC2 details in us-east-1 region.
3. Save all details using JSON Or Text format.

As well as Build a personal document consisting of what you learn with deep details and resources *i.e. this will assist you in getting back and refreshing your knowledge later.*

Bonus

1. Read about the Boto3 SDK and its components.
